

Patent [19]

[11] Patent Number: 2001294612

[45] Date of Patent: Oct. 23, 2001

[54] CATALYST FOR OLEFIN POLYMERIZATION AND POLYMERIZATION METHOD

[21] Appl. No.: 2000108406 JP2000108406 JP

[22] Filed: Apr. 10, 2000

[51] Int. Cl.⁷ C08F00469 ; C08F01000

[57] ABSTRACT

PROBLEM TO BE SOLVED: To obtain a catalyst having an industrially high polymerization activities, and capable of simultaneously satisfying the effect of producing a polyolefin having a high molecular weight and a narrow molecular weight distribution, and the effect of producing only a small amount of by-products such as low molecular weight 1-alkenes and low molecular weight alkanes, and further to provide a method for producing an olefin by using the catalyst.

SOLUTION: This catalyst for olefin polymerization consists of a supported chromium oxide catalyst supported on an inorganic oxide carrier and fired in a nonreducing atmosphere in combination with a specific organoaluminum compound and a specified organic compound. The method for polymerizing the olefin comprises using the catalyst.
